Broadband Solutions

PTToC: Push-to-Talk over Cellular

- Futureproof technologies for efficient communication
- End-to-end broadband solutions for mobile and portable use
- Personal assistance and project services

PTToC

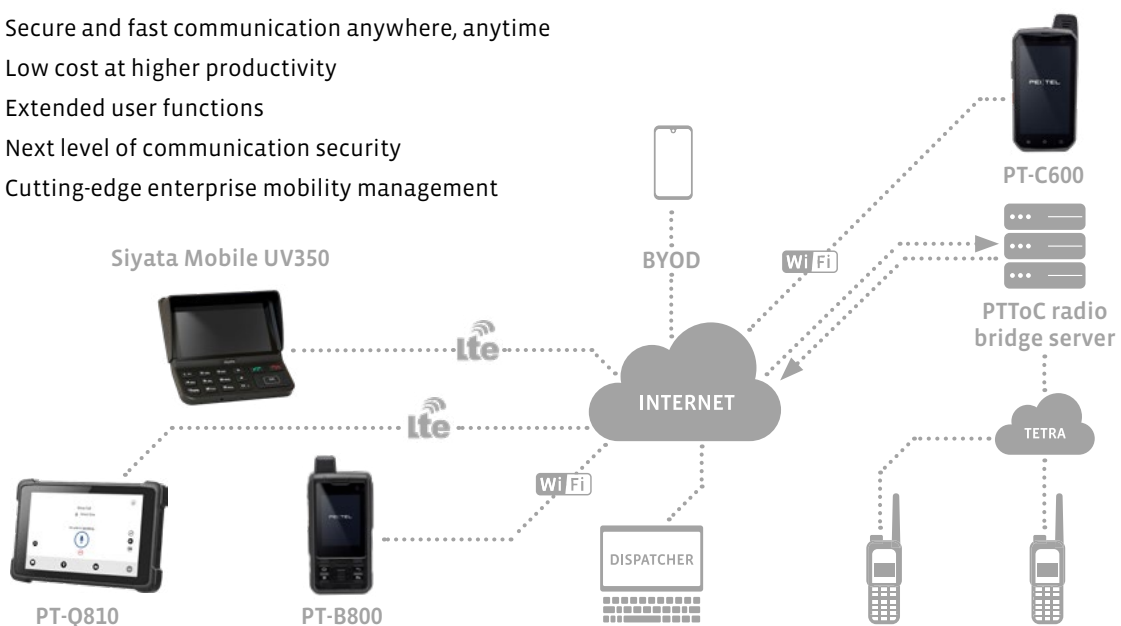

The Technology at a Glance

Combines essential voice communication, multimedia data transfer and positioning services into a single ecosystem.

PTToC solutions provide users with major benefits compared to standard radio transmission. Based on existing broadband LTE networks they ensure perfect cross-region availability and greatly enhance group and team communications.

pei tel system solutions provide you with all of these benefits while ensuring ease of installation, administration and maintenance.

- Secure and fast communication anywhere, anytime
- Low cost at higher productivity
- Extended user functions
- Next level of communication security
- Cutting-edge enterprise mobility management

PT-VCS

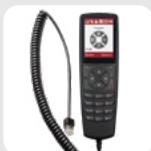

Vehicle Communication System

Fully customized modular platform. Voice over LTE and PTT over C in a single system.

Overview

- Sturdy 8" in-vehicle Android tablet
- Wi-Fi connectivity via internal PTCarPhone 6
